```
1    void aggiusta(int N, char s[]) {
2        for (int i = 0; i < N; i++) {
3            char c = s[i];
4            if (c >= 'a' && c <= 'z')
5                s[i] = c - 'a' + 'A';
6            else if (c >= 'A' && c <= 'Z')
7                s[i] = c - 'A' + 'a';
8        }
9    }
```
